

Dear guardian

Thank you for allowing the nursery schools and kindergartens to serve you and your children. As the old song goes, children are the treasures of the guardian and treasures of the country.

Mie Medical Association has created the Report on Health and Development in order to better-develop the medical examination which is conducted twice a year. Children are able to make the best start in their lives, only when all the concerned parties cooperate. We strongly hope that this Report will be a help for your child rearing.

If you should have any questions about the questionnaire on lives in the nursery school or kindergarten, please consult with the childcarers in charge. Also please be assured that we will respect your privacy.
